

NAME – ABHINAV CHAUHAN

COURSE – MCA (2A)

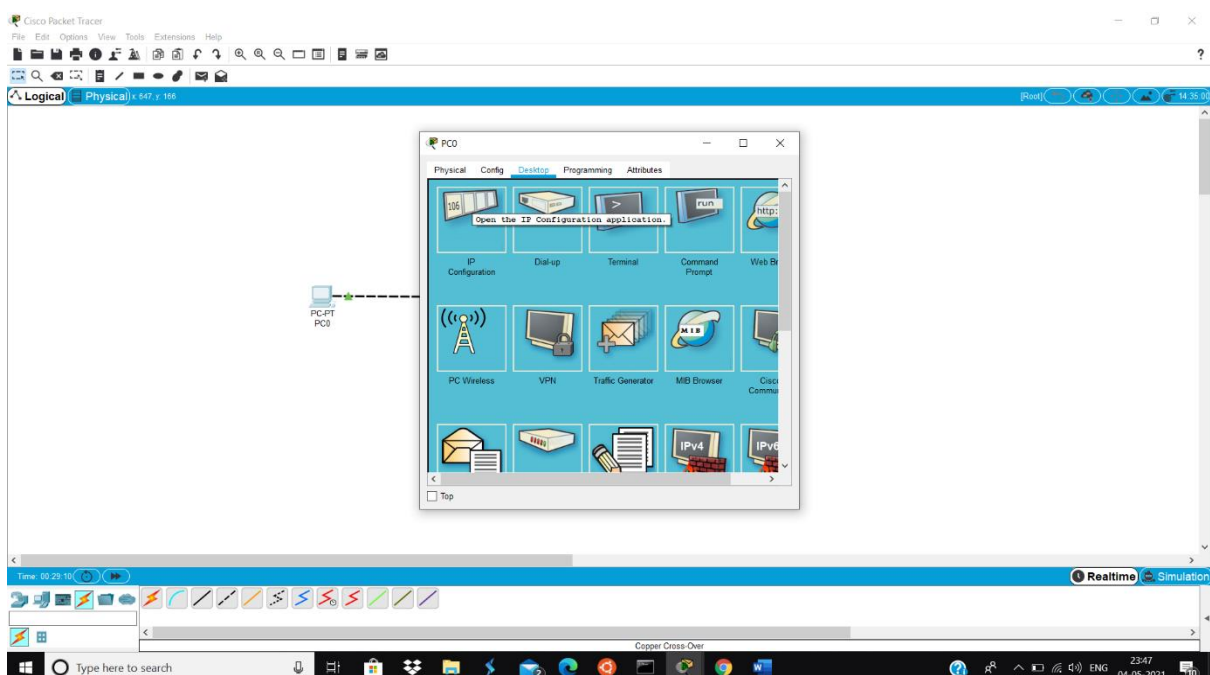

ROLL NO. – 2001004

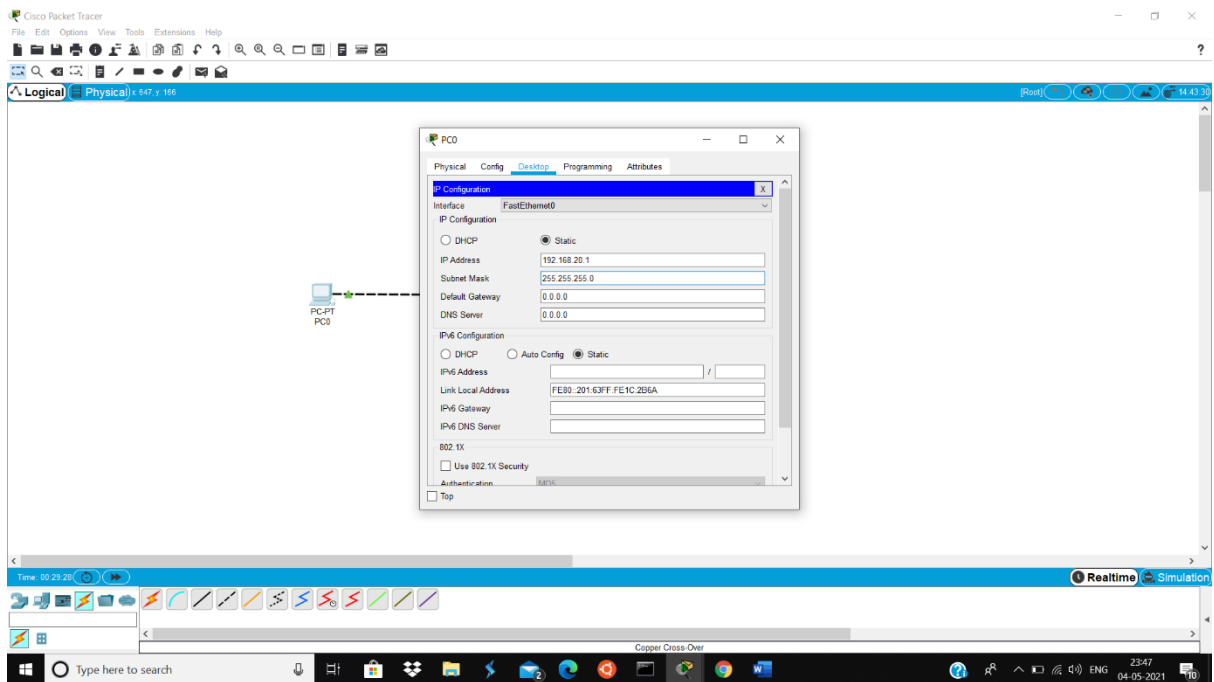

Q1 - Design a network to connect with two PCs.

- After creating two computer objects on the screen, its time to connect then with the desirable cable and stablsh a network between them.

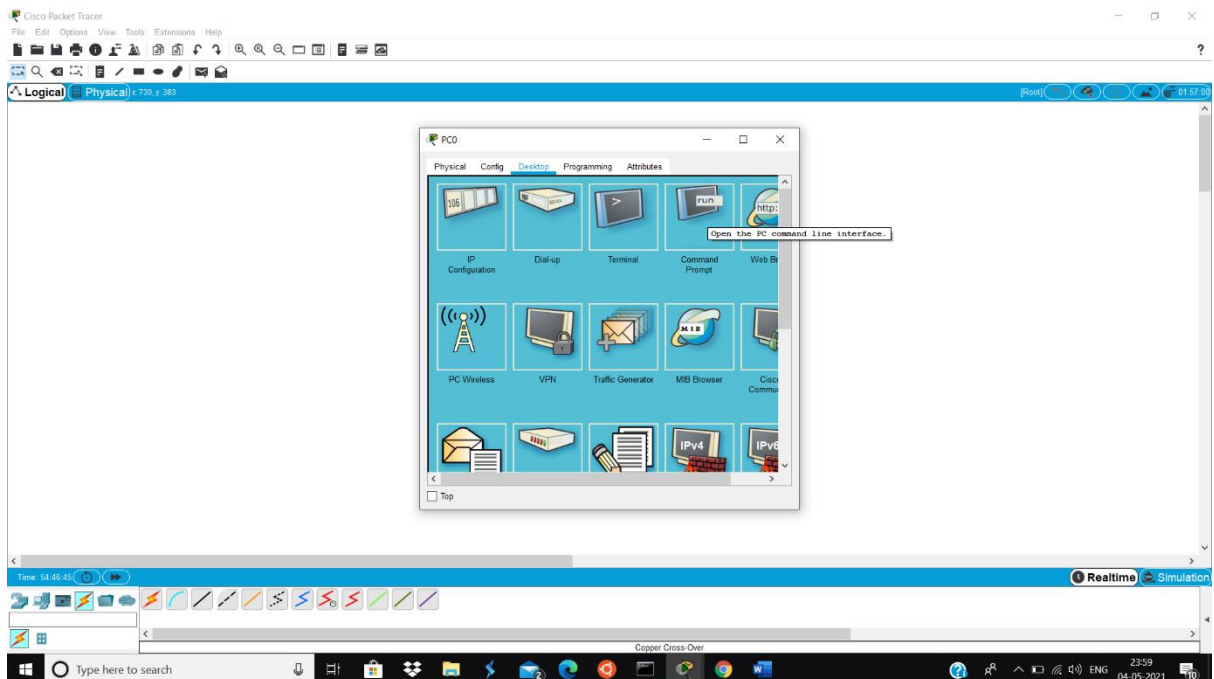

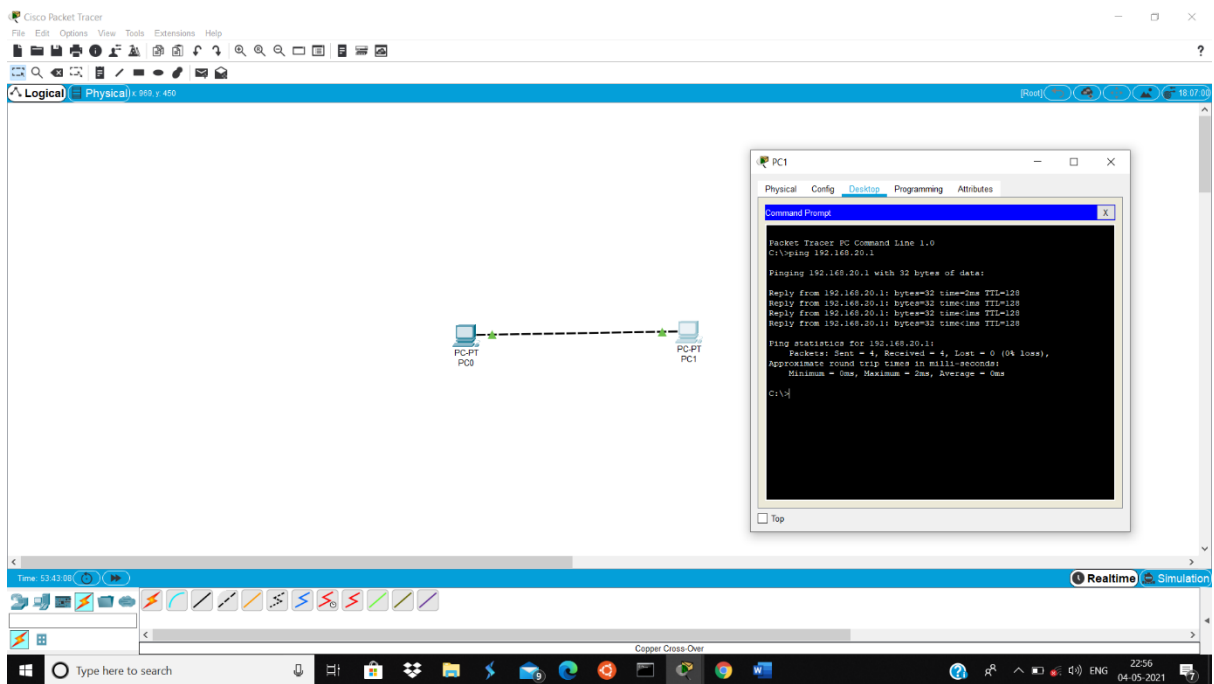

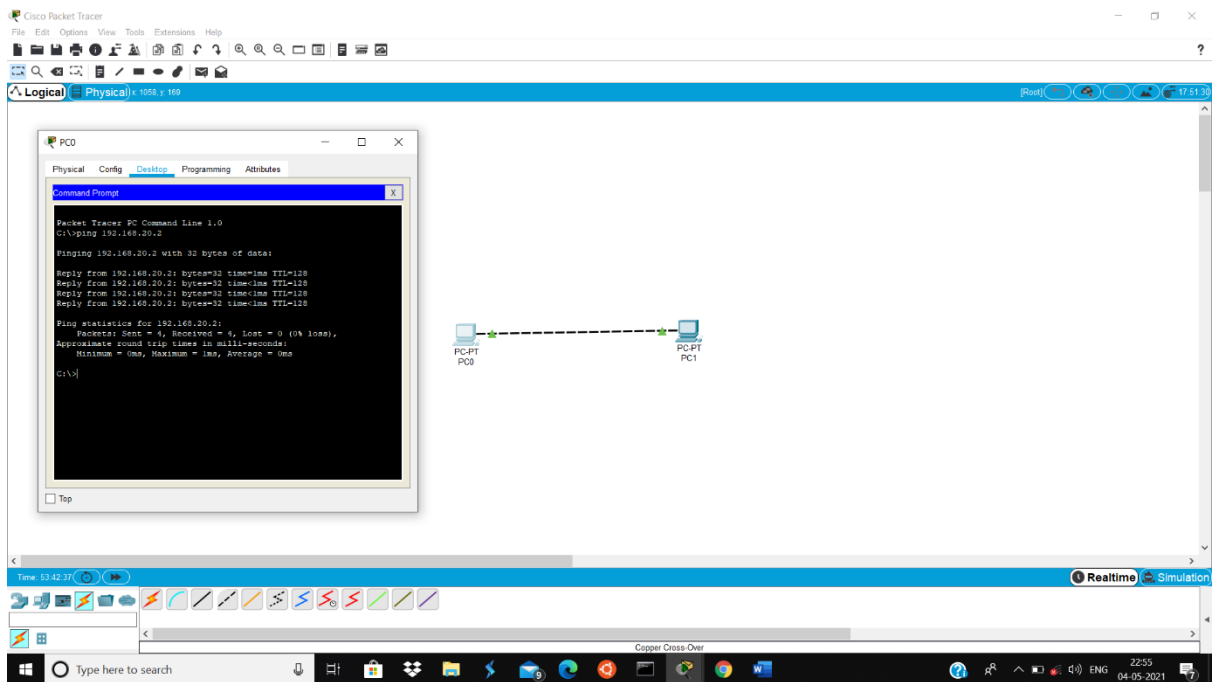

- On completing step 3, it's time to configure IP Addresses for both PC's.

- For validation if our computers can communicate or not, open command prompt and execute 'ping' command.

- Connected Successfully.
