Q2 :-	
<p>In information technology, a network is defined as the connection of at least two computer systems, either by a cable or a wireless connection.</p> <p>The simplest network is a combination of two computers connected by a cable.</p> <p>Today's networks tend to be a bit more complex and don't just consist of two computer systems with more than ten participants usually use client-server network. In these networks, a central computer/server provides resources to the other participants in the network.</p>
