CN Networking

① A computer Network is a collection of computers that has a common communication protocol, over digital interconnection for sharing the resources.

e.g. Internet.

```
┌────────┐ Communication ┌──────────┐
│ Sender │───────────────▶│ Receiver │
└────────┘   Network.     └──────────┘
```

The main advantages of Network are:

→ Shared use of data.

→) Shared use of resources

→) Central control of program & data.
